

PROJECT OUTCOMES

Within the scope of our project;

- Effective Digital Self-Assessment Report for Sustainable School Development,
- Digital Self-Assessment Toolkit,
- Digital Self-Assessment Application Software and Design,
- The Digital Self-Assessment Roadmap and Policy Proposal Report **will be developed.**

Other expected outcomes;

- Project WEB page (interactive)
- Dissemination Strategy Document
- Quality Evaluation Document.

PROJECT ACTIVITIES

Transnational Meetings

- **TPM 1** Kick-Off Meeting
- **TPM 2** -First Interim Evaluation Meeting
- **TPM 3**- Second Interim Evaluation Meeting
- Pilot implementation and reporting of results
- **TPM4**- Final Meeting

**• LEARNING-TEACHING AND TRAINING
ACTIVITIES**

- **LTTA1**-Learning Current Self-Assessment Practices inPartner Countries and EU Dimension
- **LTTA2**- Effective Digital School Self-Assessment
- **LTTA3**- Digital effective school self-assessment toolkit application training
- Multiplier Activities *In Partner Countries
- Symposium

PROJECT CONCEPT

To achieve quality in the education system; A sustainable and dynamic school development model is needed. Self-assessment and external evaluation are two important tools that ensure continuous improvement and quality in school.

In our project, experts, academics, inspectors, administrators, teachers and IT specialists will examine the latest innovations in this field and develop an effective digital self-assessment model and tool that can be used through digital tools (phone, computer, etc.).

In this respect, our project is a Strategic Partnerships Cooperation Project prepared in the field of Erasmus+ School Education Program , in which the following topics are addressed;

- Research and innovation,
- Digital content, technologies and applications,
- International relations and development cooperation

TARGET GROUP & OBJECTIVES

Target Group: The target audience of the project will be inspectors of partner institutions, education administrators, academicians, teachers, students, parent-teacher associations, parents and non-governmental organizations.

General Objectives of the Project:

- Developing an effective digital self-assessment model-tool compatible with external evaluation, in which educational institutions will be evaluated based on objective data,
- Increasing the digital transformation capacities of institutions,
- Supporting the professional development of school leaders/teachers,
- It is aimed to prepare a report that reveals the procedures, principles, criteria and tools that should be in the self-evaluation model by examining the good practices in EU countries.
